1. Let's Eat Healthy Movement: (Goal 2: Zero Hunger, Goal 3: Good Health and Well-being)

In June, Dairy Council of California launched [Let's Eat Healthy](#), a movement that brings together multisector stakeholders to coordinate, collaborate and co-create to help ensure children and families are supported to grow healthfully and find realistic solutions to address disparities in access to education and high quality, wholesome foods—two areas that can impact lifelong health and success. Through shared values, the movement aims to empower stakeholders to champion community health through nutrition, provide resources to inspire and enable healthy eating habits, and find solutions and actions to make nutritious foods, including milk and dairy, accessible and affordable to all of our diverse communities.

Nutrition education and access to nutritious foods are essential to helping children and families develop healthy eating habits that last a lifetime. Under Let's Eat Healthy, in February, Dairy Council of California proudly launched [Well-Nourished, Brighter Futures](#), a statewide initiative that brings together a diverse group of influential stakeholders in health, education and policy to elevate and find solutions to support children's health and nutrition equity. With Dairy Council of California serving as the convener, *Well-Nourished, Brighter Futures* has already held multi-disciplinary stakeholder convening's aimed at advancing its purpose—improving nutrition equity for children.

2. CA Dairy Sustainability Summit (Goal 2: Zero Hunger, Goal 3: Good Health and Well-being, Goal 12: Responsible Production and Consumption, Goal 13: Climate Action)

California's dairy farmers are leading change and making significant progress in reducing greenhouse gas (GHG) emissions and advancing planet-smart, sustainable farming practices. On November 5-6, 2020, the [California Dairy Sustainability Summit](#) brought together dairy farmers, industry leaders, government officials, leading researchers, technology providers, and sustainable food, consumer and nutrition experts to showcase innovative, planet-smart dairy farming practices, key learnings and opportunities for the dairy community, and the important role dairy plays in nourishing people during a two-day virtual conference.

Hosted by Dairy Cares in partnership with California Dairy Research Foundation, California Milk Advisory Board, California Dairy Quality Assurance Program and Dairy Council of California, the Summit was highly successful, with 900+ registrants confirmed and more than 600 attendees participating in the virtual sessions. The sessions were hosted by experts via panel discussions and keynote presentations, with speakers highlighting accomplishments and opportunities to

further improve the sustainability of family dairy farms and dairy foods across the entire supply chain. “The Future of our Food System,” a session presented by Dairy Council of CA, illustrated why the lens of sustainable nutrition is so important in advancing the critical role of nutrient-dense milk and dairy foods in an equitable, culturally diverse, climate friendly and health promoting food systems. Other sessions were led by subject matter experts who shared vision for sustainability, focusing on employees (both on farms and within processing facilities), animal welfare, the environment, economic viability, and nutrition.
